

**DEMOCRATIC REPUBLIC OF THE CONGO
NATIONAL COORDINATION FOR STRENGTHENING
COMMUNITY SYSTEM IN DRC**

« CNRSC »

Sector : Health

By Etienne TSHIMANGA

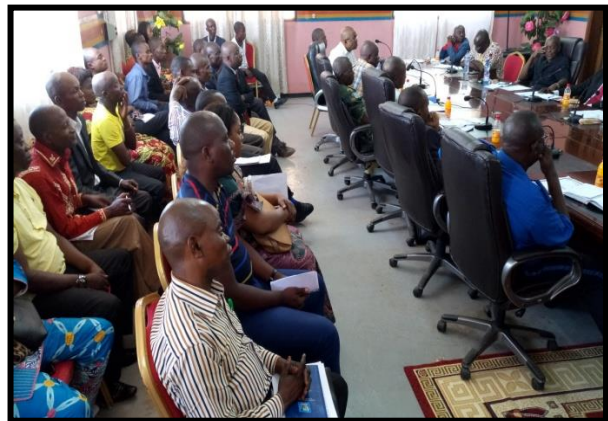

On December 30th, 2019

We are the National Coordination for the Strengthening of Community System, "CNRSC" in acronym. The CNRSC is a Civil Society Organization working in the Democratic Republic of the Congo. It was created for the needs of coordination, integration, accountability, transparency and traceability of community data. We are therefore privileged to present two small activities among our many interventions in the field:

1. Advocacy with political-administrative authorities for their involvement in eradicating illicit sales of antimalarial commodities in HPS supported by the Global Fund

This Advocacy aimed to mobilize communities to adhere to free anti-malarial care and to involve the political-administrative authorities, the Army and Police authorities, the security intelligence services and the National Directorate of Migration in taking necessary measures to put an end to illicit sale of anti-malarial commodities and medical inputs in all zones of Maniema Province.

The Governor made a solemn commitment.

2. Sensitization of pupils on the correct use of LLINs as a means of malaria prevention in 135 schools in DRC capital.

This is a field activity that targeted 54,000 pupils. A working session to harmonize the agenda of this activity was organized with school principals. The day of the beginning of this sensitization was fixed by consensus. Ambiance during sensitization on malaria transmission, prevention and treatment was very good. Particular emphasis was placed on the correct use of the LLIN.

During awareness-raising at the GYAVIRA school by civil society actors

3. Monitoring the functionality of community health care sites where free malaria care is provided, each CHS has two recosites that work on a rotational basis.

In this mission, the Civil Society ensures the follow-up supplying inputs, the functionality of the CHS and sensitization of population to use it.

**Raising community awareness prior LLINs Mass Distribution Campaign
The recosite does RDT in the SSC**
